CURVED JAW WITH WIRE CUTTER LOCKING PLIER

GO121-10

DESCRIPTION

The Grip-On Series 121 Curved Jaw with Wire Cutter Locking Pliers is an all-purpose tool that can serve as a lever, plier, clamp, pipe wrench, and wire cutter with progressive bites. The wire cutter feature of these pliers is especially useful for heavy gauge wires, making it an invaluable tool for workshops, DIY projects, and other related tasks. The narrow large opening curved shaped jaws allow for a firm hold on all round shapes, and the adjustable jaw opening ensures that it can be customized to the task at hand. The ergonomic design of the pliers ensures comfortable handling, with no pinch and easy release. The concave profile also provides better push-pull action. The forged steel jaws of superior quality ensure durability and longevity, while the epoxy paint coating on the handle is 20 times more corrosion resistant than nickel. Available in three sizes: 145mm, 190mm & 240mm.
