C-CLAMP WITH SWIVEL PADS

224 SERIES

DESCRIPTION

The Grip-On Series 224 C-Clamp with Swivel Pads is an excellent choice for anyone looking for a versatile and easy-to-use clamp. One unique feature that sets it apart from the 124 series C-Clamp is its knurled swivel pads, which adjust parallel to the workpiece and provide protection against slipping and damaging the pieces. With its one-handed operation, this clamp is much quicker and easier to handle than traditional bar-type clamps. Its wide and deep jaw profile also allows for clamping at long distances, and the adjustable jaw opening makes it suitable for various tasks such as woodworking, assembly work, mechanics work, steel fabrication, general welding, and DIY projects. Furthermore, the ergonomic design ensures comfortable handling, and the clamp has a no-pinch, easy-release feature. The concave profile also offers better push-pull control, while the forged steel jaws provide superior quality. The handle is coated with epoxy paint, which makes it 20 times more corrosion-resistant than nickel, ensuring its durability for years to come.

GO224-12

BARCODE: 8430890176226
OVERALL LENGTH: 300mm
JAW CAPACITY: 0-100mm
JAW LENGTH: 90mm
WEIGHT: 1150g

GO224-18

BARCODE: 8430890033260
OVERALL LENGTH: 470mm
JAW CAPACITY: 0-230mm
JAW LENGTH: 240mm
WEIGHT: 1420g
