PVC COATED FIBREGLASS MEASURING TAPE

DESCRIPTION

The Yamayo "Million" Long Measuring Tape is a robust tool designed for precision and durability. Featuring a fibreglass core coated with protective white PVC, it is housed in an ABS open reel for added resilience. Engineered to endure rugged use, it resists tearing and withstands extreme weather conditions, ensuring longevity. The tape boasts high accuracy and visibility, with weather-resistant properties and easy cleaning in water. Ultraviolet-fixation permeating ink keeps the markings intact for years. Its non-conductive blade, made from two non-conductive materials, ensures safety. Starting at zero from the hook blade, it guarantees precise and reliable measurements.

CODE	BARCODE	BLADE LENGTH	BLADE WIDTH	BLADE THICKNESS	GRADUATION	TENSION	MATERIAL	DIMENSIONS (HxWxD)	WEIGHT
YOTR30	4957111583242	30m	12.5mm	0.47mm	2mm (Front) 5mm (Reverse)	20N	PVC / Fibreglass	310 x 192 x 35mm	580g
