

PRODUCT INFO

# NYLON COATED STEEL MEASURING TAPE

## DESCRIPTION

The Yamayo "Stilon" Long Measuring Tape features a high carbon steel core coated with thick white nylon, encased in a durable ABS open reel. This robust construction, enhanced by a water-resistant clear coating, ensures the tape is tough, durable, and non-rusting, even in harsh conditions like seawater. Its sturdy edges significantly extend the blade's lifespan, making it unbreakable even when bent acutely, stepped on, or run over by a truck. Unlike ordinary steel tapes, it remains intact under extreme stress. The tape starts at zero from the hook (type E) blade, making it precise and reliable for all measuring needs.

CODE	BARCODE	BLADE LENGTH	BLADE WIDTH	BLADE THICKNESS	GRADUATION	TENSION	MATERIAL	DIMENSIONS (HxWxD)	WEIGHT
YNR30	4957111186139	30m	10mm	0.5mm	mm	50N	Nylon / Steel	310 x 192 x 35mm	761g
