SAVAGE™ BOX BEAM LEVELS

DESCRIPTION

The Swanson Savage™ Box Beam Levels are renowned for its unparalleled accuracy and exceptional durability. Its name derives from the unique construction of the frame, which features a rectangular design visible when cut in half. This construction grants these spirit levels unmatched robustness. The level boasts a continuous dual rail frame, ensuring stability and precision. With a remarkable 0.029° vial accuracy, it guarantees accurate readings. The level is meticulously machined for optimal performance. It also features SuperShock® end caps and Diamond™ bumpers, effectively preventing any marring. The Savage™ Strength Frame is 80% stronger than comparable models, providing superior strength and longevity. The level's acrylic block vials and multi-ring vials further enhance its precision and reliability. These Box Beam Levels are available in four different lengths to suit your needs: 600mm, 1200mm, 1800mm, and 2400mm.

SKU	BARCODE	LENGTH	WIDTH	DEPTH	VIAL ACCURACY	WEIGHT
SWSVB-060	038987912405	600mm (24")	68mm	30mm	0.029°	751g
