

PRODUCT INFO

TUNGSTEN CARBIDE TIPPED CORNER SCRAPER

HD14

DESCRIPTION

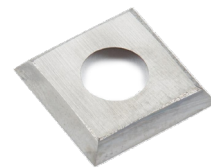

The Haydn Tungsten Carbide Tipped Corner Scraper is a versatile tool that can effectively remove old paint, varnish, and glue from any wooden surface. Its heavy-duty, ergonomically designed steel handle allows for a firm grip, and can be used with both hands to apply greater leverage. The angled head of the scraper facilitates easy flow of scraping, while the reversible blade can be quickly and easily changed. The 14mm blade comes attached on a 90-degree angle, making it perfect for use in difficult-to-access corners. This scraper is specifically designed for wooden surfaces, and its tungsten carbide tip ensures that it maintains its scraping edge for optimal performance.

FEATURES

- Removes old paint, varnish, and glue from wood.
- Heavy duty ergonomically designed steel handle.
- Reversible and easy to change blade.
- Angled head for easy scraping.
- 14mm blade attached at 90° angle for hard-to-reach corners.
- Tungsten carbide tip for optimal performance.
