

PRODUCT INFO

METALLISCANNER® MT 6

ZN-MT6

DESCRIPTION

With the Zircon Metalliscanner® MT 6 metal locator, locate embedded metal before your drill bit or saw blade does. This powerful dedicated metal scanner is the tool you need if you are sawing concrete slabs or walls that contain rebar, conduit, or plumbing. It can locate metal up to 6 in. (15.2 cm) deep in solid concrete and other non-metallic surfaces.

The MT 6 locates, and differentiates between, ferrous and non-ferrous metal and indicates the target depth in inches and centimeters. When approaching a metal object, a large plus (+) sign appears on the display. When the plus becomes a minus (-), the tool has crossed over the target and is now moving away.

Use the Metalliscanner® MT 6 to find or avoid rebar, cables, pipe, nails in reclaimed wood, nails/tacks in studs behind lath & plaster walls, electrical boxes and conduit, and more.

FEATURES

- Automatically differentiates between magnetic metal (such as rebar) and nonmagnetic metal (such as copper pipe)
- Shows the depth of metal from the surface in both inches and centimeters
- Easy-to-read LCD screen pinpoints the location of metal objects to the nearest ½ inch (13 mm) and depth to the nearest inch (25 mm)
- Helps map out the grid of metal through any nonmetallic construction material, including concrete, tile, and marble

BARCODE:	042186640533
DIMENSIONS:	227mm x 98mm x 57mm
WEIGHT:	260g (without battery)
BATTERY TYPE:	9V alkaline (not included)
DEPTH:	Up to 152mm ± 25mm
POSITION ACCURACY:	Center of #4 rebar or 13mm copper pipe at a minimum grid spacing of 152mm typically within 13mm
OPERATING TEMP:	-7° to 41°C
STORAGE TEMP:	-29° to 66°C
HUMIDITY:	5 - 90% RH (non-condensing)
WATER RESISTANCE:	Splash proof, not waterproof
