L-SHAPED ANGLE SCREW DRIVER

KW836S

DESCRIPTION

The Kanzawa L-Shaped Angle Screw Driver is a game-changer for precision fastening in tight spaces. Specifically designed as a 90-degree L-shaped attachment for 18v power impact drivers, it excels at screwing in narrow and hard-to-reach areas. This innovative tool facilitates work in positions where inserting a traditional impact driver is challenging, providing superior control at difficult angles. Boasting a remarkable capacity, it effortlessly drives coarse threads up to 75mm, while maintaining a compact profile with a head depth of 50mm. Its handle attachment on three sides enhances maneuverability, making it a versatile companion for intricate tasks. The inclusion of two PH2 x 25mm bits, one encased in the handle, and the easy Quick-Change 6.35mm hex shank further underline the tool's user-friendly design. Made in Japan.

FEATURES

- A 90-degree attachment for 18v power impact drivers.
- Ideal for screwing in narrow and hard-to-reach areas.
- Capable of driving coarse threads up to 75mm effortlessly.
- Compact design with a head depth of 50mm for tight spaces.
- Handle attachment on three sides enhances maneuverability.
- Comes with 2 PH2 x 25mm bits, one encased in the handle.
- Easy Quick-Change 6.35mm hex shank.
