L-SHAPED ANGLE DRILL

KW834

DESCRIPTION

The Kanzawa L-Shaped Angle Drill is a versatile 90-degree drill attachment designed to tackle drilling challenges in confined spaces. With a compact length of 117mm and a 10mm chuck, it excels in reaching tight corners, making it indispensable for carpentry, electrical work, plumbing, and car repairs. The handle's customizable attachment on three sides, achieved by removing cap screws, enhances maneuverability. This reversible drill ensures ease of use in all directions, providing a seamless drilling experience. Crafted with precision in Japan, its durable design and adaptability make it an essential tool for professionals navigating intricate and hard-to-reach spaces.

FEATURES

- L-Shaped 90-degree angle drill attachment.
- Ideal for drilling holes in tight spaces and corners.
- Used in carpentry, electrical, plumbing, and car repair work.
- Handle attachment on three sides for enhanced maneuverability.
- Reversible design allows easy drilling in all directions.
- Made in Japan.
