RUBBER FORCE CUP

FR150

DESCRIPTION

Field Rubber Force Cups, also known as rubber plungers, are an indispensable tool crafted from top-quality rubber, dedicated to effectively tackle stubborn blockages. Whether it's in household sinks, toilets, or drains, these reliable force cups utilize their robust rubber construction to provide the necessary suction power for clearing clogs with precision and ease. Proudly manufactured in New Zealand, these force cups stand as a testament to both their exceptional functionality and their origin's commitment to excellence. When confronted with plumbing challenges, these Field Rubber Force Cups are the go-to solution, embodying reliability rooted in top-tier materials and innovative design.

IDEAL FOR

Best used for clearing blockages in kitchen sinks, bathroom sinks, bathtubs, drains etc. They work best with flat surfaces where the rubber cup can form a tight seal.

FEATURES
